

Wyoming State Statute: 21-4-309

“(a) Any person attending, full or part time, any public or private school, kindergarten through twelfth grade, shall within thirty (30) days after the date of school entry, provide to the appropriate school official written documentary proof of immunization... No school administrator shall permit a student to attend school for more than thirty (30) calendar days without documentary proof of immunization. Waivers shall be authorized by the state or county health officer upon submission of written evidence of religious objection or medical contraindication to the administration of any vaccine. In the presence of an outbreak of vaccine preventable disease as determined by the state or county health authority, school children for whom a waiver has been issued and who are not immunized against the occurring vaccine preventable disease shall be excluded from school attendance for a period of time determined by the state or county health authority, but not suspended from school as provided in W.S. 21-4-305...(iii)"Immunized" or "immunization" means initial immunization and any boosters or reimmunizations required to maintain immunization pursuant to the immunization standards and recommendations issued by the state health officer.”

Wyoming School Immunization Requirements

Kindergarten – Grade 12

REVISED 2017

Minimum Immunization Requirements: Parents/guardians must provide proof of immunizations or provide documentation of medical or religious exemptions from mandatory immunizations within 30 days of enrollment or child will be excluded from school until documentation is received.

Vaccination for	Kindergarten – Grade 6	Grade 7-12
Diphtheria/tetanus/acellular pertussis (DtaP) or Diphtheria/Tetanus/Pertussis (DTP) or Diphtheria/Tetanus (DT)	5 doses ¹	Complete Series
Haemophilus Influenza Type B (Hib)	1-4 doses ²	N/A
Hepatitis B (Hep B)	3 doses	3 doses
Measles/Mumps/Rubella (MMR)	2 doses	2 doses
Polio (IPV)	3-4 doses ³	3-4 doses ³
Tetanus/Diphtheria/Acellular Pertussis (Tdap) ⁵	N/A	1 dose ⁴
Varicella (chickenpox)	2 doses or documented history of disease ⁵	2 doses or documented history of disease ⁵

Footnotes:

1. If a fourth (4th) dose of DTaP vaccine was administered on or after a child's fourth (4th) birthday, and at least six (6) months has passed since the third (3rd) dose, a fifth (5th) dose is not required.
2. The number of primary doses of Hib vaccine is determined by vaccine product and age the series begins. If a child has not received the completed series of Hib vaccine and is younger than 60 months (5 years) of age, the child should receive one (1) dose of the Hib vaccine. Hib vaccine is not required for children age 5 years and older.
3. Children who receive three (3) doses of IPV before the fourth (4th) birthday should receive a fourth (4th) dose before or at school entry. The fourth (4th) dose is not needed if the third (3rd) dose is given on or after the fourth (4th) birthday.
4. Children eleven (11) years of age and older should receive the Tdap vaccine. Children with a medical contraindication to the pertussis (whooping cough) antigen should receive Td instead of the Tdap vaccine. Tdap vaccine may be administered to a child regardless of the interval since the last tetanus- or diphtheria-toxoid containing vaccine.
5. If a child has had chickenpox the parent, guardian, school nurse, or physician must provide a written statement for the student's permanent school record. A student who has been diagnosed with a history of herpes zoster (i.e. Shingles) is considered as having evidence of immunity to Varicella.

Campbell County School District #1

Mandatory Immunizations for Children Attending Schools; Exceptions

(Wyoming State Statute: 21-4-309)

1. Students of Campbell County School District will abide by Wyoming State Statute: 21-4-309. Please contact school nurses, public health official or healthcare provider for clarification as needed.
2. Students of Campbell County School District will not be allowed to attend school, according to Wyoming State Statute: 21-4-309, without proof of adequate immunization status, proof of progression to obtain adequate immunization status, or appropriate documentation of a religious or medical exemption for required vaccinations.
3. Students of Campbell County School District may obtain required vaccinations from personal health care providers or Campbell County Public Health Department.
4. Campbell County Public Health Department provides most required immunizations for free to students 18 years and younger.
